SUMMARY

Computer Engineering student majoring in Networks, at Ateneo de Naga University. Developer with 3 months of commissioned project work building web apps and internal tools. VITRO Academy Certified Data Center Specialist (Top 10% of five universities). Experienced virtual assistant for US-based clients, comfortable with remote async work. Proven leader (Ateneo de Naga University Symphonic Band)

WORK EXPERIENCE

Developer & Automations Engineer

Jul 2026 - Present

Freelance | Remote

- Built a full-stack dashboard and automation platform using Next.js, React, and PostgreSQL for an Italian social media agency, streamlining multi-channel marketing data, financial tracking, and scheduled client campaigns across various third-party APIs and 6 daemon processes.
- Built an in-house Apify web scraping actor using TypeScript, Crawlee, and residential proxies to reliably ingest Reddit account metrics, posts, and engagement data at scale while bypassing strict rate limits.
- Developed an internal tool for a US-based SEO client, that selects and scores backlink domains from their inventory - picks a client niche, pulls in evidence via Ahrefs/AI/HTTP, classifies and scores each domain, produces a reviewable table for human intervention, then exports a curated list.

Tech Intern

Jun 2026 - Jul 2026

Integrya Technologies | Remote

Bonifacio Global City, Taguig City, Philippines

- Built a full-stack project management system (Django, React, PostgreSQL) that automates extraction of actionable work items from a company format meeting minutes and QA documents, with role-based access control, Slack integration, and AWS deployment.

AI Operations Virtual Assistant

Jan 2026 - May 2026

Part-Time | Remote

- Conducted research and followed strict SOPs to generate high-quality and consistent ingredients that are funneled into generative AI workflows.
- Built multi-phase prompt systems that turn rough ideas into concrete scripts with designated prompts for media generation.

Laptop Technician

Aug 2023 - Nov 2025

Freelance

- Performed L1 and L2 technical support on various laptop models: internal cleaning and changing thermal paste, OS and app installations, backups and point restoration, tech queries.

EDUCATION

BS Computer Engineering (Networks Track)

Aug 2022 - Jul 2027

Ateneo de Naga University

Naga City, Philippines

- University Band Scholarship Grantee (Marching Leader 2022-23, Band Vice-President 2023-24, Band Librarian 2023-25, Trombone Section Leader 2023-2025).
- Member, Ateneo de Naga University Computer Engineering Society

SKILLS

LANGUAGES: Python, Typescript, Dart

FRAMEWORKS: React, Next.js, Vite, Flutter, FastAPI

TOOLS & PRACTICES: Git, n8n, AI Engineering, Automation, API Development

DATABASE: PostgreSQL, Supabase, Drizzle ORM, SQLite

PERSONAL PROJECTS

Mnemosyne

- Local-first AI memory system (Python, React, SQLite, Chroma DB) with semantic search and LLM-powered extraction. Exposes MCP and REST APIs to integrate with external AI tools.

Ops Deck

- AI-powered operations dashboard (Next.js, Tailwind, Supabase, Vercel AI SDK) that auto-extracts invoice/receipt data and triages support tickets. n8n automations intake from Telegram and Google Drive; users review, edit, and export categorized data as CSV.

Personal Website

- Built and deployed a personal portfolio and interactive resume using Next.js, Tailwind CSS, Neon, and Vercel.

μBrew

- Built a personal coffee-tracking app using Flutter and Supabase featuring custom brew timers, parameter logging, and bean inventory management.

CERTIFICATIONS

Data Center Specialist

VITRO Academy

- Certified Data Center Specialist (Top 10% of five universities)
